## SUMMARY

---

Student of Associate Degree Informatics Engineering at University of AMIKOM Yogyakarta with concentration in Website. I have an interest in Backend Web Development. During college, there were several courses that I liked. Namely Pemrograman Web Lanjut and Development Framework. This course uses the Codeigniter 3, Laravel frameworks, and Ionic framework that use React.js. I can create a simple application by using the framework. And I will develop my abilities again.

## EXPERIENCE
